Forbes

Starter Story

Full-cycle Product Development

Our approach is all about agile delivery. There's never a perfect plan; we're sprinting through flexible weekly milestones. Have a fixed budget and scope? We can deal with it as well.

[Click to see more](#)

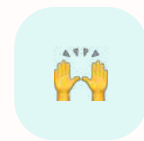

360° Responsibility

We're responsible for the end result. No place for delays or issues.

Quality is a Must-Have

All features pass our QA/Code Review before submission. Pay after testing yourself.

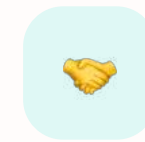

Agile Workflow

Weekly demos to get your feedback. We revise a product roadmap if need be.

Vast Experience

We develop efficiently because 80% of what you need we've done in 50+ other projects.

Flexible Commitment

Scale up/down a team if needed. We easily adjust to your needs.

Coding Transparency

The code is running on your infra and the source is always open to you.

Staff Augmentation

Our mission is to handpick top 5% talents through a rigorous vetting. We hire business-focused team players with the strongest tech background. 9/10 clients find a perfect fit for their team at Voypost.

Fast Time-to-Hire

Get the developer on board within 48 hours.

Fair Pricing

No hidden costs or extra fees. Cheaper than hiring in-house.

Time-zone Compatible

Our developers work in your time-zone. No delays or setbacks.

Risk-free Trial

Pause cooperation & get a cost-free replacement if not happy with your dev.

Only Vetted Experts

We hire only the top 5% from the market. [Read how we vet our devs.](#)

Fully Managed

Personal Account Manager, compliance, contracts, payrolls are on us.

UX/UI and Product Design

Only 2% of vetted designers, in 48h, all at a fair price. Break free from the hiring hassle: dozens of portfolios, numerous interviews, slow onboarding and still bad hires. We offer...

Free Design Concept

We share a free UX design concept within 24h so you can see if our visions align.

Behind-the-Scenes Power

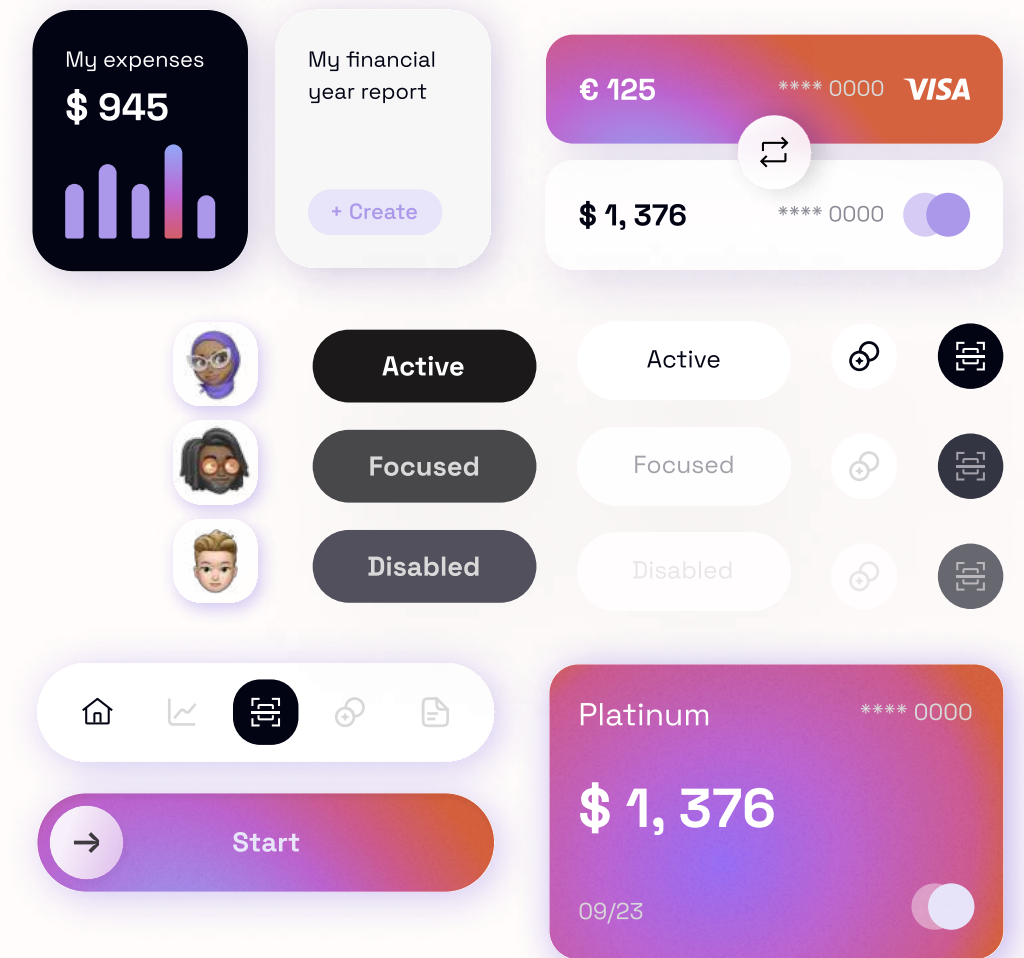

Senior-level design at a fair price. If hiring a mid designer, their work is supervised by our Lead Designer.

Unlimited Iterations

Revise the work over and over again unless you're 100% happy with what you see.

Fixed Standards

Every Voypost design is done using the same standards so it's easily maintained.

Deep Market Research

Product Business Analyst provides valuable market insights to avoid stepping on a rake and overpass your competitors effectively.

High-Level Architecture

Solutions Architect makes sure your future app is high-performing, scalable and secure.

Roadmap & Timeline Estimate

Project Manager tracks the progress and budget allocation with a clear development plan.

User-flow visualization

Lead Designer prepares wireframes to visualize the user-flow and define the missing features.

Test Strategy

QA Lead leaves no room for bugs. Only the highest testing standards for happy user experience.

Corti Case study

Corti is an AI-based artificial intelligence development company. Corti's voice recognition technology helps doctors keep track of the information provided by patients while AI suggests relevant questions to clarify the diagnosis and more.

Main challenge

Corti users were lacking a management experience over the data received from their voice assistant. The goal was to develop a dashboard providing it.

Head of Product

Parqio Case study

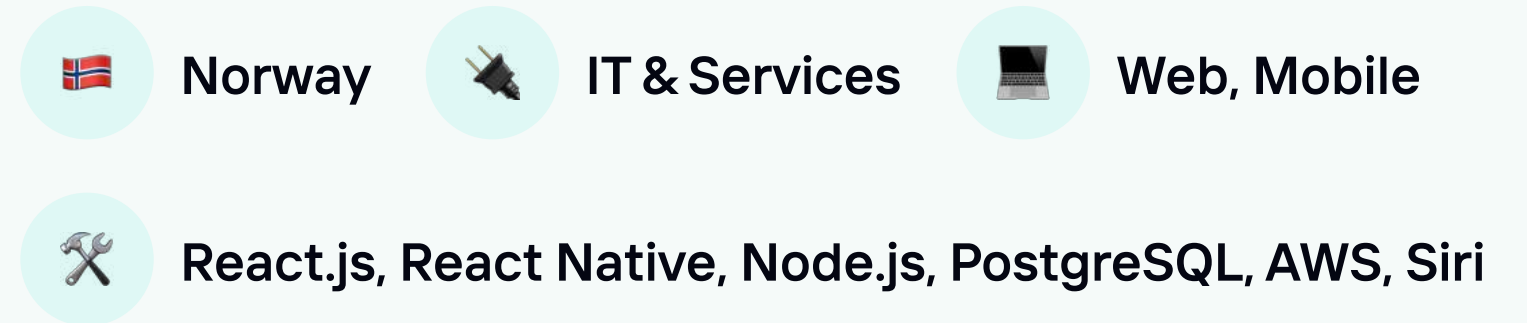

Parqio is an app revolutionizing parking space sharing. Taking inspiration from the likes of Airbnb and Uber, Parqio's approach to change the way people rent out parking spaces and garages.

Main challenge

Reach Parqio mobile parking space management app project goals faster: launch the MVP version and proceed to implement third-party integrations, develop custom API, upgrade the design, etc.
